Building Area · 1400 m²
Location · Tel Aviv, Israel
Principal Materials · Aluminum · Natural Stone · Bare concrete
Principal Structure · Bare Concrete
Photos · Amit Geron
Text · Pisou Kedem Architects
Interview · Chloe Su
Review · Jason Chen

剖面圖 A-A' SECTION A-A'

本案名稱源自其特殊的屋頂設計，獨特的幾何結構使之幾乎脫離建築立面，彷彿漂浮於量體之上，繼而產生一種懸浮的視覺效果。坐落於寧靜住宅區，此項目擁有長達9公尺之立面，令人印象深刻；一條傾斜的混凝土坡道，自屋外延伸向內。沿其而行，首先穿越一道白色格牆，鏤空的幾何造型成就良好通風；接著經過一面灰白色混凝土牆，不僅為內部空間提供遮蔽，粗曠紋理亦與簡約格牆形成鮮明對比。兩牆之間為一座綠意盎然的庭院，為本案注入蓬勃生機，亦為地下場域引入充足光線，包括家庭桑拿室，以及奧林匹克規格之泳池，一側水療牆與之平行，外部以幾何鋁板覆蓋與屋頂結構相呼應，並在陽光的照射下於池面映出斑斕浮動的倒影。此外，團隊於中央天花設置約七個大小不一、形狀各異的天窗，使自然光能夠恣意傾瀉入室。綜觀整體，本案透過幾何與光線的互動，於純白量體中刻畫出耐人尋味的空間表情，營造別緻韻味。

The floating effect is reiterated in the roof, which is almost completely detached from the house's walls and seems to hover above the structure. The roof is characterized by a distinctive geometric structure that protrudes beyond the walls of the house. Located in a quiet residential neighborhood, this one-story house welcomes visitors with a particularly impressive 76-meter-long facade. A sloping concrete causeway leads inside through a white geometric mashrabiyah that stretches across the entire length of the facade and a bare concrete wall, allowing light into the basement level, which serves as a home spa complete with an Olympic-size swimming pool. The spa wall that runs along the pool's length is characterized by diagonal geometry that echoes the roof and is covered with aluminum, reflecting the patterns of light in the pool water. No less than 47 skylights in varying sizes and shapes were incorporated in the ceiling of the central space as an additional source of natural light.
